Fair Strike is a WWII style helicopter combat game with a strong emphasis on the gameplay over graphics. Fast paced gameplay combined with a good set of objectives to complete and a wide range of difficulty levels make Fair Strike a great game for those who enjoy realistic combat simulation games. The concept of this game is that of a Japanese soldier, sniping down the Americans from the back of a US army helicopter. Remember "Jungle Strike" and "Desert Strike" for any of the old school consoles? Make the game prettier and add control that is much more involved and you will have a good idea of what to expect. While you are familiar with the controls, you can still find ways to play and use your skills in a different way than most helicopter games. The main objective of Fair Strike is to survive as long as possible while completing the objective. The secondary objective is to kill all enemies on the map. There are two parts to the main map: the first is an area that contains the enemies, and the second is a map that you can traverse, flanked by
