Microbial community analysis of natural biogas digesters reveals species with probable biosynthetic potential. The presence of methane in biogas is a consequence of the fermentation of biodegradable substrates by methanogenic microorganisms. The microbial ecology of natural, thermophilic biogas production has been well characterized. In the present study, we characterised the microbial communities in raw and anaerobically digested biogas using denaturing gradient gel electrophoresis, fluorescent in situ hybridisation and cultivation methods. In a previous study, we showed that the microbial community of raw biogas was primarily composed of Archaea and Gram-positive Bacteria, while the profile of anaerobically digested biogas was similar to that of pure cultures of Gram-positive Bacteria. Here, we reveal that archaeal lineages were almost absent from raw biogas and dominated both the Archaea- and Bacteria-like community in anaerobically digested biogas, while Gram-positive bacteria dominated both the Gram-positive and Bacteria-like community. Furthermore, we show that methanogenic Archaea are readily detected in anaerobically digested biogas using fluorescent in situ hybridisation and show a similar profile to those identified using 16S rDNA gene-targeted fluorescent in situ hybridisation, suggesting that Archaea could be converted into Bacteria-like microorganisms through some unknown process. Our results confirm that anaerobic digestion is a major energy source and well characterised for its biogas potential. Further efforts to explore the unknown metabolic potential of Archaea in natural systems are warranted.

WASHINGTON — A Senate race in Alabama recently has become something of a referendum on two important issues: how President Obama is handling the health-care overhaul and how Mitt Romney views the 47 percent of Americans who don't pay federal income taxes. With the midterm election just days away, a broad swath of Alabama is preparing to

do battle with the health-care bill that has infuriated many conservatives. And the contest is quickly becoming a proxy for the presidential election, in which Mr. Romney has tried to portray Mr. Obama as a tax-and-spend liberal who doesn't understand the working class. "He, like the president, hasn't had a clue what the middle class is like," said John McCawley, a Democrat who is running in a district south of Montgomery. "
