I'm trying to set value of a combobox (within a gridview) to the value of another combobox. This is the code I've tried but it doesn't work: `ComboBox combo1 = (ComboBox)e.Row.Cells[2].Controls[0]; combo2 = (ComboBox)e.Row.Cells[3].Controls[0]; combo1.SelectedItem = combo2.SelectedItem; A: The main problem is that the ComboBox control is inside the GridViewRowDataBound event, and this is when it is not visible. So if you want to change the value of the ComboBox, you will need to do it in the RowDataBound event, and work with the values from the GridViewRow that is being bound, not the Row you are looking at. protected void GridView1_RowDataBound(object sender, GridViewRowEventArgs e) { if (e.Row.RowType == DataControlRowType.DataRow) { ComboBox combo1 = (ComboBox)e.Row.FindControl("cmb"); ComboBox combo2 = (ComboBox)e.Row.FindControl("cmb1"); combo1.SelectedIndex = combo2.SelectedIndex; } } The above code only changes the value of the first ComboBox. If you want to change the other ComboBox, then just change the first code block to be a nested if statement. Hope this helps. Q:`
